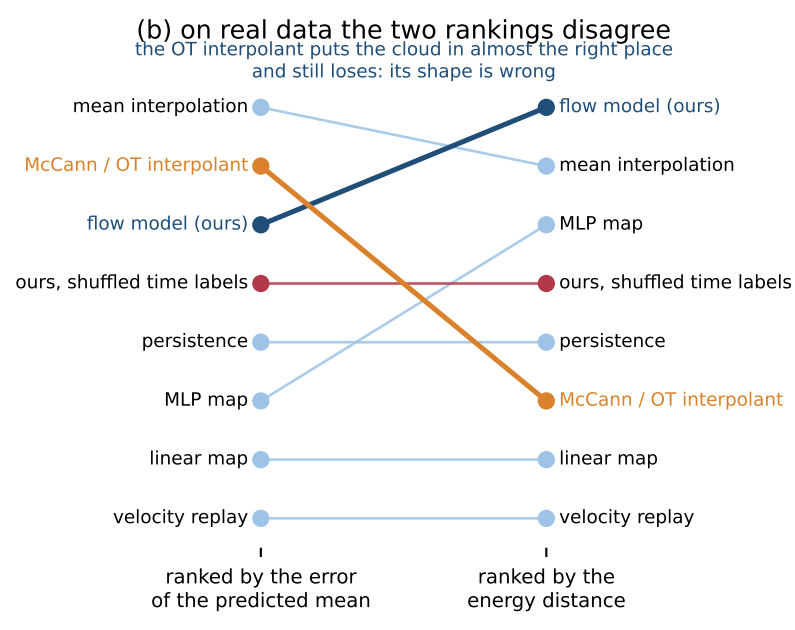
permutation threshold 0.006
flow model (ours)
mean interpolation
MLP map
ours, shuffled time labels
persistence
McCann / OT interpolant
linear map
velocity replay



(b) on real data the two rankings disagree
the OT interpolant puts the cloud in almost the right place
and still loses: its shape is wrong
mean interpolation
McCann / OT interpolant
flow model (ours)
ours, shuffled time labels
persistence
MLP map
linear map
velocity replay
flow model (ours)
mean interpolation
